Educational justice, Mayor de Blasio? Charter schools fixed that for you

By Robert Pondiscio

New York City Mayor Bill de Blasio wants to make admission to Stuyvesant, Bronx Science, and the city's other selective high schools more racially equitable. It's a laudable impulse, but it's also anachronistic and unnecessary. The primary rationale for widening the on-ramp to these schools is to increase the number of low-income African American and Hispanic students on track to attend selective colleges and universities. But this important work is already being done by the city's charter schools—and in numbers that dwarf the capacity of Stuyvesant and Bronx Science, even under the rosiest scenarios proposed by the Mayor. Ending poverty as we've known (and measured) it?

By Chester E. Finn, Jr.

A big surprise= 2and mountain of confusion—is coming to everyone who cares about educating poor kids, not to mention every policy wonk in the K-12 realm. The definition of “poor” and “disadvantaged” is changing for the first time in decades, and the outcome is going to be a prolonged period of instability and inconsistency. The primary gauge of poverty in the education system has long been how many students qualify for subsidized meals via the federally-funded National School Lunch Program, a measure that seriously exaggerates poverty’s extent~~→~~ 0and distorts its locations—among students. But this is all in flux now. [Read more.](#)

Here's how Catholic schools instill self-discipline

By Dr. Thomas Burnford

To anyone who has worked in, attended, or sent their children to a Catholic school, the findings of Fordham's recent study *Self-Discipline and Catholic Schools* are no surprise. These institutions are dedicated to educating the whole child—mind, body, and spirit—with a focus on the development of intellect, personhood, and relationships. Those priorities are evident in the study's major findings: Catholic school students exhibit more self-control and self-discipline and are less likely to act out or be disruptive than students in other private or public schools. There are several reasons why Catholic schools are able to accomplish this laudable feat. [Read more.](#)

The child poverty rate plummeted after welfare reform. Here's what that means for education.

By Michael J. Petrilli

When measured correctly, the U.S. child poverty rate declined from 13.1 percent in 1996 to 7.8 percent in 2014—a drop of almost two-fifths. This has huge implications for many policy areas, including education reform. For the teachers' unions and other traditional education groups, it raises hard questions that are still relevant today about their familiar contention that America's lackluster student achievement is due to poverty—that we must “fix poverty first” before our

schools will improve. Considering that these socioeconomic trends should put the wind at our backs, it also ought to make reformers wonder why we haven't seen greater progress in student outcomes over the past twenty years. [Read more.](#)

"PERSONALIZED PACING" WOULD BE A REAL REVOLUTION. ARE OUR ELEMENTARY SCHOOLS READY FOR IT?

On this week's podcast, Karla Phillips, a policy director at the Foundation for Excellence in Education, joins Mike Petrilli and David Griffith to discuss what it would mean for elementary schools to implement personalized learning. On the Research Minute, Amber Northern examines the effects of career and technical education on students' future wages.

STUDY

The effects of D.C.'s voucher program

By David Griffith

A recent federally-funded evaluation examined the impacts of the D.C. Opportunity Scholarship Program after two years. Overall, its authors estimate that participating in the program reduced

students' achievement by about 10 percentile points in math and about 3.8 percentile points in English language arts, though the latter estimate isn't statistically significant. Nor did the program have a significant effect on parental involvement or satisfaction. On a brighter note, however, it did positively impact parents? 9 and students' perceptions of school safety. How much one cohort of students is learning, according to NAEP

By Emily Howell

What the National Assessment of Educational Progress reveals about student achievement across the fifty states is more complex than simple score comparisons. In a recent report from the Brookings Institution, Matthew Chingos follows NAEP cohorts from fourth to eighth grade, finding that students in some states make gains at both levels, while others regress by eighth grade or, conversely, catch up despite a slow start. REPORT:

Self-Discipline and Catholic Schools: Evidence from Two National Cohorts

Regardless of where you stand on the debate currently raging over school discipline, one thing seems certain: Self-discipline is far better than the externally imposed kind. Over the years, Catholic schools have been particularly committed to the formation of sound character, including the acquisition of self-discipline. But how well has that worked? Do students in Catholic school actually exhibit more self-discipline than their peers—and if so, what can those schools teach other public and private schools about how it can be fostered? Our new report examines these questions and finds that students in Catholic schools exhibit more self-control and self-discipline and are less likely to act out or be disruptive than peers in other private or public schools. This suggests that schools that value and focus on self-discipline will likely do a better job of fostering it in children; that other schools have something to learn from Catholic schools when it comes to fostering self-discipline; and that we should not underestimate the power of religion to positively influence a child's behavior—and thus shouldn't restrict families' choices on the basis of religion. New Skills for Youth highlights CTE progress around the nation

By Jessica Poiner

Two years ago, JPMorgan Chase & Co. launched a \$75 million five-year initiative called New Skills for Youth. The goal was to expand access to high-quality career and technical education programs that can lead students to postsecondary degrees, credentials, and well-paying jobs. The first year of phase two is now complete, and a recently released 2017 snapshot outlines the "notable progress" that selected states made in designing, enhancing, and scaling high-quality career pathways. Here's a look at how a few of these states addressed four of the most crucial aspects of high-quality CTE. [Read more.](#)

Catholic schools' competitive advantage: Self-discipline in the school-choice era

By J. Jacob Kirksey

The core of the Catholic school "brand" is a dual focus on "human development" and academic success, says the coauthor of Fordham's recent report *Self-Discipline and Catholic Schools?* A strikingly sane approach that serves as an implicit rebuke to educational researchers' and policymakers' tendency to fixate on test scores, and coincides with students in these institutions demonstrating better self-control than their peers at other schools. But these findings raise other questions, such as: What accounts for the Catholic school advantage? And answers will require a qualitative approach—one that focuses on observing actual classrooms and talking to teachers and parents about how their kids are doing. [Read more.](#)

How Ohio should distribute its school improvement funds

By Jessica Poiner

When Ohio state report cards are released this fall, it will be the first time that summative letter grades are assigned to districts and schools. It will also be the first time that these summative ratings are used to identify the state's lowest performing 5 percent of schools, a requirement of ESSA. Seven percent of the state's Title I dollars will be set aside for efforts to turnaround those schools. And one promising solution is a shuttered and short-lived competitive grant program called the Straight A Fund. Despite its brief life, the program showcased some promising ideas and results, and ESSA presents a chance for Ohio to revive it and capitalize on its strengths and improve its weaknesses. STATE BOARD OF EDUCATION APPROVES STRATEGIC

PLAN – At its June meeting, the State Board of Education approved its strategic plan, *EachChild=OurFuture*, laying out a framework for the state's educational goals, strategies and guiding principles. The plan= 2s vision is that EachChild graduates from high school, and each graduate is prepared with the knowledge, skills and disposition to pursue his or her chosen post-high school path and become a lifelong learner who is an engaged, culturally aware and contributing member of society. The overarching goal is to annually increase the percentage of Ohio= 2s high school graduates who, within one year of graduation, are: 1) Enrolled and succeeding in a post-high school learning experience, including an adult career-technical education program, an apprenticeship and/or a two-year or four-year college program (15 semester hours); or 2) Serving in a military branch; or 3) Earning a living wage.

STATE BOARD OF EDUCATION APPROVES STRATEGIC

PLAN – At its June meeting, the State Board of Education approved its strategic plan, *EachChild=OurFuture*, laying out a framework for the state's educational goals, strategies and guiding principles. The plan= 2s vision is that EachChild graduates from high school, and each graduate is prepared with the knowledge, skills and disposition to pursue his or her chosen post-high school path and become a lifelong learner who is an engaged, culturally aware and contributing member of society. The overarching goal is to annually increase the percentage of Ohio= 2s high school graduates who, within one year of graduation, are: 1) Enrolled and succeeding in a post-high school learning experience, including an adult career-technical education program, an apprenticeship and/or a two-year or four-year college program (15 semester hours); or 2) Serving in a military branch; or 3) Earning a living wage.

English Learners

English-Learners Aren't 'Perpetually Struggling,' We Just Aren't Gauging Their Progress, Study Finds – EdWeek

- Current and former English-language learners have made significant progress in the past 15 years on the test dubbed the "Nation's Report Card"—improving faster than English-only students. That's the takeaway from a study released this morning in the journal *Education Researcher*. Michael Kieffer, an associate professor at New York University, and Karen Thompson, an assistant professor at Oregon State University, found that 4th and 8th grade multilingual students' scores on the National Assessment of Educational Progress in math and reading have risen two to three times faster since 2003 than those of students who speak only English at home

School Safety & Discipline

Video Games? Media? Bullying? No Single Cause for School Shootings, Experts Tell Safety Commission – EdWeek

- One-by-one, experts speaking to a federal school safety commission addressed factors commonly blamed for school shootings: bullying, mental health issues, violent video games, and media coverage. All of those issues require a thoughtful, research-based response, the panelists told the commission, chaired by U.S. Secretary of Education Betsy DeVos, but tackling any single factor alone will not be enough to eliminate school violence

Mental Health & Wellness

Growing Pressures Feed Kids' Mental Health Issues, Expert Says – Columbus Dispatch

- It's not your imagination, or mere nostalgia for the good ol' days: Today's children and teens have more mental-health problems than earlier generations. The reason is a mix of social, environmental and even dietary factors, but the problem is growing, said experts speaking Wednesday to the Columbus Metropolitan Club

Teens Take Fewer Risks with Sex and Drugs But Face New Challenges = 6
